## PRESS RELEASE

19 November 2024 08:30:00 CET

## NIMBUS GROUP HAS INITIATED SEA TRIALS OF NEW AQUADOR 400 HT

Nimbus Groups has initiated sea trials of the new Aquador 400 HT, the last boat in the series of three new Aquador boats that began to be launched in the summer of 2022. Aquador 400 HT will be officially premiered in January next year, at the international boat fair Boot Düsseldorf.

With a length overall (LOA) of just over 12 meters and a beam of nearly 4 meters, the Aquador 400 HT is the largest boat from Aquador to date. The boat has three cabins, a total of 8 berths and a separate shower compartment. The new Aquador 400 HT can be equipped with inboard or outboard engines.

"With the new 400 HT, Aquador takes a clear step up in the premium segment, a segment that Nimbus Group has increased its focus on in recent years. For a boat manufacturer, the premium segment offers several advantages such as higher margins, a more stable market with lower volatility and a significantly more predictable sales and manufacturing process," says Jan-Erik Lindström, CEO of Nimbus Group.

The Aquador 400 HT will be shown at a special press event in early December when it will also be presented in more detail to invited dealers. Starting in the summer of 2022, Nimbus Group began the launch of a completely new generation of boats from Aquador. The new generation includes three new boat models and represents the biggest product renewal for the brand in 20 years. The first boat from the new generation to be presented was the Aquador 300 HT which was followed by the Aquador 250 HT. With the launch of the Aquador 400 HT, the entire new generation of boats from Aquador has been launched.
